

Confirmation about
Contribution to the reduction of
Greenhouse gases and the
Consumption of natural resources

Tullemans B.V.
has contributed to the
112.077,80 CO₂-eq
and
80.109,30 KG
crude oil-eq
could be saved.

With every ton of used oil, a contribution is made towards producing sustainable base oil, closing material cycles and conserving natural resources *. In this way, 1,490 kg CO₂-eq can be saved per ton of recyclable used oil compared to the use of crude oil in primary refining. This also corresponds to resource conservation of 1,065 kg of natural resources in the form of crude oil equivalents.
